DECISION AND RATE ORDER

EB-2023-0241

ALECTRA UTILITIES CORPORATION

**Application for rates and other charges to be effective
January 1, 2024**

BY DELEGATION, BEFORE: **Theodore Antonopoulos**
Vice President
Applications

December 14, 2023

1. OVERVIEW

The Ontario Energy Board is approving changes to the rates that Alectra Utilities Corporation (Alectra Utilities) charges to distribute electricity to its customers, effective January 1, 2024. This Decision impacts each of Alectra Utilities' five rate zones (RZ): the Enersource RZ (covering the service area of the former Enersource Hydro Mississauga Inc.); the Brampton RZ (covering the service area of the former Hydro One Brampton Networks Inc.); the Powerstream RZ (covering the service of the former PowerStream Inc.); the Horizon RZ (covering the service area of the former Horizon Utilities Corporation; and the Guelph RZ (covering the service area of the former Guelph Hydro Electricity System Inc.).

As a result of this Decision, effective January 1, 2024, the monthly bill impact for a residential customer consuming 750 kWh will be as follows:

- For the Enersource RZ, there will be a monthly total bill increase of \$4.67.
- For the Brampton RZ, there will be a monthly total bill increase of \$3.30.
- For the PowerStream RZ, there will be a monthly total bill increase of \$3.62.
- For the Horizon RZ, there will be a monthly total bill increase of \$3.85.
- For the Guelph RZ, there will be a monthly total bill increase of \$3.52.

The bill impacts shown do not factor in applicable taxes or the Ontario Electricity Rebate.

2. CONTEXT AND PROCESS

Alectra Utilities filed its application on August 17, 2023 under section 78 of the *Ontario Energy Board Act, 1998* and in accordance with Chapter 3 of the OEB's [Filing Requirements for Incentive Rate-Setting Applications](#) (Filing Requirements). The application was based on the Price Cap Incentive Rate-setting (Price Cap IR) option.

The Price Cap IR option is one of three incentive rate-setting mechanisms (IRM) approved by the OEB.¹ It involves the setting of rates through a cost of service application in the first year and mechanistic price cap adjustments which may be approved through IRM applications in each of the ensuing adjustment years.

Following the merger in 2017 of the four utilities that formed Alectra Utilities, the distributor was granted a ten-year deferred rebasing period from 2017 to 2026 for the Horizon RZ, Enersource RZ, PowerStream RZ and Brampton RZ. The fifth utility, the former Guelph Hydro Electricity System Inc., was acquired by Alectra Utilities subsequent to the merger and accordingly, for the Guelph RZ, the distributor was granted a ten-year deferred period from 2019 to 2028. The Price Cap IR option is applicable to each of Alectra Utilities' rate zones throughout the deferred rebasing period.

The OEB follows a standardized and streamlined process for processing IRM applications filed under Price Cap IR. In each adjustment year of a Price Cap IR term, the OEB prepares a Rate Generator Model that includes, as a placeholder, information from the distributor's past proceedings and annual reporting requirements. A distributor will then review, complete, and include the model with its application, and may update the model during the proceeding to make any necessary corrections or to incorporate new rate-setting parameters as they become available.

Alectra Utilities serves approximately 1,077,000 mostly residential and commercial electricity customers in its five rate zones. These five rate zones cover 17 communities that include: the cities of Hamilton and St. Catharines in the Horizon RZ; the City of Brampton in the Brampton RZ; the cities of Barrie, Markham and Vaughan and the towns of Aurora, Richmond Hill, Alliston, Beeton, Bradford West Gwillimbury, Penetanguishene, Thornton, and Tottenham in the PowerStream RZ; the City of Mississauga in the Enersource RZ; and the City of Guelph and the Village of Rockwood in the Guelph RZ.

¹ Each of these options is explained in the OEB's [Handbook for Utility Rate Applications](#).

The application was supported by pre-filed written evidence and a completed set of Rate Generator Models and as required during the proceeding, Alectra Utilities updated and clarified the evidence.

3. DECISION OUTLINE

Each of the following issues is addressed in this Decision, together with the OEB's findings.

- Annual Adjustment Mechanism
- Retail Transmission Service Rates
- Low Voltage Service Rates
- Group 1 Deferral and Variance Accounts
- Lost Revenue Adjustment Mechanism Variance Account
- Renewable Generation Connection Rate Protection
- Capitalization Deferral Accounts
- Earnings Sharing Mechanism

Instructions for implementing Alectra Utilities' new rates and charges are set out in the final section of this Decision.

This Decision does not address rates and charges approved by the OEB in prior proceedings, such as specific service charges² and loss factors, which are out of the scope of an IRM proceeding and for which no further approvals are required to continue to include them on the distributor's Tariff of Rates and Charges.

² Certain service charges are subject to annual inflationary adjustments to be determined by the OEB through a generic order. For example, the Decision and Order EB-2023-0193, issued September 26, 2023 established the adjustment for energy retailer service charges, effective January 1, 2024; and the Decision and Order EB-2023-0194, issued September 26, 2023, established the 2024 Wireline Pole Attachment Charge, effective January 1, 2024.

4. ANNUAL ADJUSTMENT MECHANISM

Alectra Utilities has applied to change its rates, effective January 1, 2024, based on a mechanistic rate adjustment using the OEB-approved **inflation minus X-factor** formula applicable to IRM applications. The adjustment applies to distribution rates (fixed and variable) uniformly across all customer classes.³

The components of the Price Cap IR adjustment formula applicable to Alectra Utilities are set out in the table below. Inserting these components into the formula results in a 4.50% increase to Alectra Utilities' rates: **4.50% = 4.80% - (0.00% + 0.30%)**.

Table 4.1: Price Cap IR Adjustment Formula

Components		Amount
Inflation factor ⁴		4.80%
Less: X-factor	Productivity factor ⁵	0.00%
	Stretch factor (0.00% to 0.60%) ⁶	0.30%

An inflation factor of 4.80% applies to all IRM applications for the 2024 rate year. The X-factor is the sum of the productivity factor and the stretch factor. It is a productivity offset that varies among different groupings of distributors. Subtracting the X-factor from inflation ensures that rates decline in real, constant-dollar terms, providing distributors with a tangible incentive to improve efficiency or else experience declining net income. The productivity component of the X-factor is based on industry conditions over a historical study period and applies to all IRM applications for the 2024 rate year. The stretch factor component of the X-factor is one of five stretch factor groupings established by the OEB, ranging from 0.00% to 0.60%. The stretch factor assigned to any distributor is based on the distributor's total cost performance as benchmarked against other distributors in Ontario. The stretch factor assigned to Alectra Utilities is 0.30%, resulting in a rate adjustment of 4.50%.

³ The adjustment does not apply to the following components of delivery rates: rate riders, rate adders, low voltage service charges, retail transmission service rates, wholesale market service rate, smart metering entity charges, rural or remote electricity rate protection charge, standard supply service – administrative charge, transformation and primary metering allowances, loss factors, specific service charges other than the Wireline Pole Attachment charge, and microFIT charge.

⁴ [OEB Letter, 2024 Inflation Parameters, issued June 29, 2023](#)

⁵ Report of the Ontario Energy Board – “Rate Setting Parameters and Benchmarking under the Renewed Regulatory Framework for Ontario’s Electricity Distributors” EB-2010-0379, December 4, 2013

⁶ Report to the Ontario Energy Board – “Empirical Research in Support of Incentive Rate-Setting: 2022 Benchmarking Update”, prepared by Pacific Economics Group LLC., July 2023

Findings

Alectra Utilities' request for a 4.50% rate adjustment is in accordance with the annually updated parameters set by the OEB. The adjustment is approved, and Alectra Utilities' new rates shall be effective January 1, 2024.

5. RETAIL TRANSMISSION SERVICE RATES (RTSRs)

Each of Alectra Utilities' rate zones is partially embedded within Hydro One Networks Inc.'s (Hydro One) distribution system. On September 28, 2023, the OEB announced preliminary Uniform Transmission Rates (UTRs) effective January 1, 2024.⁷ The OEB also announced that an embedded distributor may update its RTSRs with Hydro One's proposed host RTSRs.⁸

Alectra Utilities updated its RTSRs based on the preliminary UTRs and Hydro One's proposed host RTSRs. The OEB sets the UTRs based on the approved revenue requirements for multiple transmitters. Preliminary UTRs are based on those revenue requirements that have already been approved for 2024. These preliminary UTRs are to be used for the setting of RTSRs to minimize the accumulation of variances in Retail Settlement Variance Accounts 1584 (Retail Transmission Network Charge) and 1586 (Retail Transmission Connection Charge). The cost consequences of any future adjustments to 2024 UTRs to reflect remaining approvals to a transmitter's revenue requirement will be tracked in these accounts and recovered over time.

To recover its cost of transmission services, Alectra Utilities requests approval to adjust the RTSRs that it charges its customers in accordance with the preliminary UTRs and proposed host RTSRs for Hydro One.

Findings

Alectra Utilities' proposed adjustment to its RTSRs is approved. The RTSRs have been adjusted based on the preliminary UTRs⁹ and proposed host-RTSRs for Hydro One.¹⁰

In the event that final UTRs and/or final host-RTSRs differ from the preliminary UTRs and/or proposed host-RTSRs, the resulting differences will be captured in Retail Settlement Variance Accounts 1584 (Retail Transmission Network Charge) and 1586 (Retail Transmission Connection Charge).

⁸ Ibid.

⁹ Ibid.

¹⁰ EB-2023-0030, Interrogatory Response #4

6. LOW VOLTAGE SERVICE RATE

Each of Alectra Utilities' rate zones is partially embedded within Hydro One's distribution system.

Low voltage transactions, which are not part of the wholesale electricity market, are charged to a distributor by its host distributor. To recover the cost of its low voltage transactions, Alectra Utilities requests approval to adjust its Low Voltage Service Rates (LV Service Rates) that it charges its customers as part of this IRM application. The adjusted LV Service Rates are based on the current OEB-approved host distributor sub-transmission rates applicable to embedded distributors and the most recent demand data for low voltage transactions.

Findings

Alectra Utilities' proposed adjustment to its LV Service Rates is approved. The LV Service Rates have been updated based on the current OEB-approved host distributor's sub-transmission rates applicable to embedded distributors. In the event that the OEB updates the approved distributor sub-transmission rates applicable to embedded distributors during Alectra Utilities' 2024 rate year, any resulting differences are to be captured in Account 1550 LV Variance Account.

7. GROUP 1 DEFERRAL AND VARIANCE ACCOUNTS

In each year of an IRM term, the OEB will review a distributor's Group 1 deferral and variance accounts to determine whether those balances should be disposed of. OEB policy states that Group 1 account balances should be disposed of if they exceed, on a net basis (as a debit or credit), a pre-set disposition threshold of \$0.001 per kWh, unless a distributor justifies why balances should not be disposed of.¹¹ If the net balance does not exceed the threshold, a distributor may still request disposition.¹²

Included in the Group 1 accounts are certain variances related to costs that are paid for by a distributor's customers on different bases, depending on their classification. Namely, "Class A" customers, who participate in the Industrial Conservation Initiative, pay for Global Adjustment (GA) charges based on their contribution to the five highest Ontario demand peaks over a 12-month period. "Class B" customers pay for GA charges based on their monthly consumption, either as a standalone charge or embedded in the Regulated Price Plan (RPP).¹³ A similar mechanism applies to Class A and Class B customers for Capacity Based Recovery (CBR) charges.¹⁴ The balance in the GA variance account is attributable to non-RPP Class B customers and is disposed of through a separate rate rider. The balance in the CBR Class B variance account is attributable to all Class B customers.

Horizon RZ

The 2022 year-end net balance for the Horizon RZ Group 1 accounts eligible for disposition, including interest projected to December 31, 2023, is a debit of \$17,410,899, and pertains to variances accumulated during the 2022 calendar year. This amount represents a total claim of \$0.0033 per kWh, which exceeds the disposition threshold. Alectra Utilities has requested disposition of this amount over a one-year period.

Alectra Utilities had one or more Class A customers in the Horizon RZ during the period in which variances accumulated so it has applied to have the balance of the CBR Class B variance account disposed of through a separate rate rider for Class B customers to ensure proper allocation between Class A and Class B customers.

¹¹ Report of the OEB – "Electricity Distributors' Deferral and Variance Account Review Initiative (EDDVAR)", EB-2008-0046, July 31, 2009

¹² OEB letter, "Update to the Electricity Distributors' Deferral and Variance Account Review ("EDDVAR Report")", released July 2009 (EB-2008-0246)", issued July 25, 2014

¹³ For additional details on the Global Adjustment charge, refer to the Independent Electricity System Operator (IESO)'s [website](#).

¹⁴ All Class B customers (RPP and non-RPP) pay the CBR as a separate charge based on their monthly consumption. For additional details on the CBR for Class A customers, refer to the IESO's [website](#).

During the period in which variances accumulated, Alectra Utilities had one or more customers in the Horizon RZ transition between Class A and Class B. Under the general principle of cost causality, customer groups that cause variances that are recorded in Group 1 accounts should be responsible for paying (or receiving credits) for their disposal. Alectra Utilities has proposed to allocate a portion of the Horizon RZ GA and CBR Class B balances to its transition customers, based on their customer-specific consumption levels.¹⁵ The amounts allocated to each transition customer are proposed to be refunded by way of 12 equal monthly installments.

Findings

The balances proposed for disposition reconcile with the amounts reported as part of the OEB's *Electricity Reporting and Record-Keeping Requirements*.

The OEB approves the disposition of a debit balance of \$17,410,899 as of December 31, 2022, including interest projected to December 31, 2023, for the Horizon RZ Group 1 accounts on a final basis.

Table 7.1 identifies the principal and interest amounts, which the OEB approves for disposition.

Table 7.1: Horizon RZ - Group 1 Deferral and Variance Account Balances

Account Name	Account Number	Principal Balance (\$) A	Interest Balance (\$) B	Total Claim (\$) C=A+B
LV Variance Account	1550	346,787	30,494	377,281
Smart Metering Entity Charge Variance Account	1551	(654,851)	(37,831)	(692,682)
RSVA - Wholesale Market Service Charge	1580	9,772,505	651,846	10,424,351
Variance WMS - Sub-account CBR Class B	1580	(414,412)	(31,045)	(445,457)
RSVA - Retail Transmission Network Charge	1584	6,492,486	449,773	6,942,258

¹⁵ 2024 IRM Rate Generator Model, Tab 6.1a "GA Allocation" and Tab 6.2a "CBR B_Allocation"

RSVA - Retail Transmission Connection Charge	1586	2,867,758	191,100	3,058,858
RSVA - Power	1588	(463,011)	(51,231)	(514,242)
RSVA - Global Adjustment	1589	(1,606,571)	(98,912)	(1,705,482)
Disposition and Recovery/Refund of Regulatory Balances (2020)	1595	(120,335)	86,348	(33,987)
Total for Group 1 accounts		16,220,357	1,190,542	17,410,899

The balance of each of the Group 1 accounts approved for disposition shall be transferred to the applicable principal and carrying charge sub-accounts of Account 1595. Such transfer shall be pursuant to the requirements specified in the *Accounting Procedures Handbook for Electricity Distributors*.¹⁶ The date of the transfer must be the same as the effective date for the associated rates, which is generally the start of the rate year.

The OEB approves these balances to be disposed of through final rate riders, charges, or payments, as calculated in the Rate Generator Model. The final rate riders, charges, and payments, as applicable, will be in effect over a one-year period from January 1, 2024 to December 31, 2024.¹⁷

Brampton RZ

The 2022 year-end net balance for the Brampton RZ Group 1 accounts eligible for disposition, including interest projected to December 31, 2023, is a debit of \$13,862,664, and pertains to variances accumulated during the 2022 calendar year. This amount represents a total claim of \$0.0033 per kWh, which exceeds the disposition threshold. Alectra Utilities has requested disposition of this amount over a one-year period.

RSVA - Global Adjustment	1589	(2,075,484)	(130,052)	(2,205,536)
Disposition and Recovery/Refund of Regulatory Balances (2020)	1595	(291,006)	(247,422)	(538,428)
Total for Group 1 accounts		26,440,287	1,562,022	28,002,309

The balance of each of the Group 1 accounts approved for disposition shall be transferred to the applicable principal and carrying charge sub-accounts of Account 1595. Such transfer shall be pursuant to the requirements specified in the *Accounting Procedures Handbook for Electricity Distributors*.²⁵ The date of the transfer must be the same as the effective date for the associated rates, which is generally the start of the rate year.

The OEB approves these balances to be disposed of through final rate riders, charges, or payments, as calculated in the Rate Generator Model. The final rate riders, charges, and payments, as applicable, will be in effect over a one-year period from January 1, 2024 to December 31, 2024.²⁶

²⁵ Article 220, Account Descriptions, Accounting Procedures Handbook for Electricity Distributors, effective January 1, 2012

²⁶ 2024 IRM Rate Generator Model Tab 6.1 GA, Tab 6.1a GA Allocation, Tab 6.2 CBR B, Tab 6.2a CBR B_Allocation and Tab 7 Calculation of Def-Var RR

Guelph RZ

The 2022 year-end net balance for the Guelph RZ Group 1 accounts eligible for disposition, including interest projected to December 31, 2023, is a debit of \$6,889,843, and pertains to variances accumulated during the 2022 calendar year. This amount represents a total claim of \$0.0042 per kWh, which exceeds the disposition threshold. Alectra Utilities has requested disposition of this amount over a one-year period.

Alectra Utilities had one or more Class A customers in the Guelph RZ during the period in which variances accumulated so it has applied to have the balance of the CBR Class B variance account disposed of through a separate rate rider for Class B customers to ensure proper allocation between Class A and Class B customers.

During the period in which variances accumulated, Alectra Utilities had one or more customers in the Guelph RZ transition between Class A and Class B. Alectra Utilities has proposed to allocate a portion of the Guelph RZ GA and CBR Class B balances to its transition customers, based on their customer-specific consumption levels.²⁷ The amounts allocated to each transition customer are proposed to be recovered (or refunded, as applicable) way of 12 equal monthly installments.

Findings

The balances proposed for disposition reconcile with the amounts reported as part of the OEB's *Electricity Reporting and Record-Keeping Requirements*.

The OEB approves the disposition of a debit balance of \$6,889,843 as of December 31, 2022, including interest projected to December 31, 2023, for the Guelph RZ Group 1 accounts on a final basis.

Table 7.5 identifies the principal and interest amounts, which the OEB approves for disposition.

Table 7.5: Guelph RZ - Group 1 Deferral and Variance Account Balances

Account Name	Account Number	Principal Balance (\$) A	Interest Balance (\$) B	Total Claim (\$) C=A+B
LV Variance Account	1550	93,317	6,462	99,779

²⁷ 2024 IRM Rate Generator Model, Tab 6.1a "GA Allocation" and Tab 6.2a "CBR B_Allocation"

Smart Metering Entity Charge Variance Account	1551	(161,513)	(9,435)	(170,947)
RSVA - Wholesale Market Service Charge	1580	3,534,327	234,690	3,769,016
Variance WMS - Sub-account CBR Class B	1580	(87,473)	(6,822)	(94,294)
RSVA - Retail Transmission Network Charge	1584	1,565,277	110,452	1,675,729
RSVA - Retail Transmission Connection Charge	1586	460,102	33,682	493,784
RSVA - Power	1588	934,953	76,850	1,011,803
RSVA - Global Adjustment	1589	80,441	24,532	104,973
Total for Group 1 accounts		6,419,431	470,412	6,889,843

The balance of each of the Group 1 accounts approved for disposition shall be transferred to the applicable principal and carrying charge sub-accounts of Account 1595. Such transfer shall be pursuant to the requirements specified in the *Accounting Procedures Handbook for Electricity Distributors*.²⁸ The date of the transfer must be the same as the effective date for the associated rates, which is generally the start of the rate year.

The OEB approves these balances to be disposed of through final rate riders, charges, or payments, as calculated in the Rate Generator Model. The final rate riders, charges, and payments, as applicable, will be in effect over a one-year period from January 1, 2024 to December 31, 2024.²⁹

²⁸ Article 220, Account Descriptions, Accounting Procedures Handbook for Electricity Distributors, effective January 1, 2012

8. LOST REVENUE ADJUSTMENT MECHANISM VARIANCE ACCOUNT

The OEB has historically used a Lost Revenue Adjustment Mechanism Variance Account (LRAMVA) to capture implications on a distributor's revenues which arise from differences between actual and forecast conservation and demand management (CDM) savings included in its last OEB-approved load forecast. The use of the LRAMVA is no longer the default approach for CDM activities.³⁰

Distributors delivered CDM programs to their customers through the Conservation First Framework (CFF) that began on January 1, 2015 until March 20, 2019, when the CFF was revoked.³¹

Distributors filing an application for 2024 rates are required to seek disposition of all outstanding LRAMVA balances related to program savings related to CFF programs or other conservation programs they delivered, unless they do not have complete information on eligible program savings.³²

Distributors are also eligible for LRAM for persisting impacts of conservation programs until their next rebasing. The OEB previously provided direction for distributors to seek approval of LRAM-eligible amounts for 2023 onwards on a prospective basis, and a rate rider in the corresponding rate year, to address amounts that would otherwise be recorded in the LRAMVA for all years until their next rebasing application.

Alectra Utilities has applied to dispose of its LRAMVA debit balance of \$20,373,495. The balance consists of lost revenues from 2022 to 2023 from CDM programs delivered in these years and persistence of savings from programs delivered in prior years, and carrying charges. During the proceeding, Alectra Utilities updated its LRAMVA balance to reflect the Q4 2023 OEB-prescribed interest rate of 5.49%. This update results in an increase of \$22,848 and a revised LRAMVA balance of \$20,396,343. The actual conservation savings claimed by Alectra Utilities under the CFF were validated with reports from the IESO, project level savings files, or both. Additionally, Alectra Utilities has requested to dispose of its prospective 2024 LRAMVA balance of \$9,495,890.

³⁰ Conservation and Demand Management Guidelines for Electricity Distributors, December 20, 2021, chapter 8

³¹ On March 20, 2019 the Minister of Energy, Northern Development and Mines issued separate Directives to the OEB and the IESO.

³² Chapter 3 Filing Requirements, section 3.2.7.1

Actual conservation savings were compared against forecasted conservation savings included in the last OEB-approved load forecasts.³³

Alectra Utilities has proposed that the majority of its LRAMVA balances be recovered over 12 months, including all amounts in the Horizon RZ, PowerStream RZ and Enersource RZ. However, similar to its request in its 2023 rate application, Alectra Utilities has proposed to recover the 2022 to 2024 LRAMVA balances for the Guelph RZ and Brampton RZ Street Lighting rate classes over 36 months and to recover the 2022 to 2023 LRAMVA balance for the Brampton RZ Unmetered Scattered Load rate class over 24 months to mitigate the bill impacts. The resulting total bill impact is about 23% for the Guelph RZ Street Lighting rate class, 12% for the Brampton RZ Street Lighting rate class, and 8% for the Brampton RZ Unmetered Scattered Load rate class. Alectra Utilities indicated that it has communicated the proposed bill impacts and options for various recovery periods to municipal representatives in all affected areas and received agreement for these proposals.

Alectra Utilities also applied for approval of LRAM-eligible amounts for the years 2024 to 2026 on a prospective basis for all rate zones, arising from persisting savings from completed CDM programs.

Findings

The OEB finds that Alectra Utilities' LRAMVA balance has been calculated in accordance with the OEB's CDM-related guidelines and updated LRAMVA policy. The OEB approves the disposition of Alectra Utilities' LRAMVA debit balance of \$20,396,343, as set out in Table 8.1 below.

Table 8.1 LRAMVA Balance for Disposition

Rate Zone	Account Name	Account Number	Actual CDM Savings (\$) A	Forecasted CDM Savings (\$) B	Carrying Charges (\$) C	Total Claim (\$) D=(A-B)+C
Horizon RZ	LRAMVA	1568	2,832,670	1,366,898	63,414	1,529,186
Brampton RZ	LRAMVA	1568	4,089,363	717,138	146,093	3,518,319
PowerStream RZ	LRAMVA	1568	10,925,853	4,110,693	293,508	7,108,668
Enersource RZ	LRAMVA	1568	8,949,257	3,063,406	255,826	6,141,677

³³ EB-2014-0083 (Brampton Hydro), EB-2012-0033 (Enersource), EB-2014-0002 (Horizon Utilities), EB-2015-0073 (Guelph), EB-2015-0003 (PowerStream)

Guelph RZ	LRAMVA	1568	2,409,003	397,068	86,560	2,098,494
Total			29,206,145	9,655,203	845,401	20,396,343

The balance in the LRAMVA is now zero, and no further entries to the LRAMVA are permitted at this time. The LRAMVA will not be discontinued, in the event that Alectra Utilities requests the use of the LRAMVA for a CDM activity in a future application, which the OEB will consider on a case-by-case basis.³⁴

The OEB also approves the LRAM-eligible amounts for the years 2024 to 2026, arising from persisting savings from completed CDM programs, as set out in the following tables for each rate zone below. These amounts will be adjusted mechanistically by the approved inflation minus X factor applicable to IRM applications in effect for a given year and recovered through a rate rider in the corresponding rate year, beginning with the 2024 rate year. For the 2024 rate year, the OEB approves the requested LRAM-eligible amount of \$9,495,890,³⁵ a debit to be recovered from customers, and the associated rate riders. Should Alectra Utilities rebase in, or prior to, the last year in Table 8.2, amounts shown in Table 8.2 in the year of rebasing or later will not be recoverable, as any persisting impacts of CDM can be taken into consideration in setting new base rates.

Table 8.2 LRAM-Eligible Amounts for Prospective Disposition³⁶

Year	Horizon RZ LRAM-Eligible Amount		Brampton RZ LRAM-Eligible Amount		PowerStream RZ LRAM-Eligible Amount		Enersource RZ LRAM-Eligible Amount		Guelph RZ LRAM-Eligible Amount		Total 2024\$
	2023 \$	2024 \$	2023 \$	2024 \$	2023 \$	2024 \$	2023 \$	2024 \$	2023 \$	2024 \$	
2024	682,876	713,606	1,609,475	1,681,901	3,357,347	3,508,428	2,446,503	2,556,595	990,776	1,035,361	9,495,890
2025	567,268	592,795	1,446,651	1,511,750	3,155,219	3,297,204	1,847,944	1,931,101	934,291	976,334	8,309,184
2026	501,552	524,122	1,380,696	1,442,827	3,061,264	3,199,021	1,596,328	1,668,163	921,322	962,782	7,796,915

³⁴ Conservation and Demand Management Guidelines for Electricity Distributors, December 20, 2021, page 28

³⁵ This amount is arrived at by applying the applicant's approved rate adjustment of 4.5% for the 2024 rate year to the applicant's approved 2024 LRAM-eligible amount of \$9,086,976 calculated based on the rates in effect for 2023.

³⁶ Each of the 2024 LRAM-Eligible Amounts set out in the table is calculated as follows: *(approved LRAM-eligible amount for a given rate year in 2023 dollars) x (2024 approved inflation minus X-factor)*.

9. RENEWABLE GENERATION CONNECTION RATE PROTECTION

Subsection 79.1 (1) of the *Ontario Energy Board Act, 1998* (OEB Act) states that the OEB may provide Renewable Generation Connection Rate Protection (RGCRP) compensation amounts to eligible distributors. Ontario Regulation 330/09 (Cost Recovery Re Section 79.1 of the Act), made under the OEB Act, prescribes the methodology the OEB uses to determine the amount to be collected for any given year.

Ontario distributors are required to plan their systems based on their expectations of new electricity generation projects connecting to their systems. Based on their plans, distributors can apply to the OEB for funding to recover the cost of assets to enable and to connect generators to their distribution systems, including generators using renewable sources of energy such as wind or solar. The OEB is permitted to take steps to ensure that all Ontario consumers, not just the ratepayers of the individual distributor, contribute to the costs of investments to connect renewable generators in accordance with applicable legislation.

The OEB approved 2021 RGCRP funding for the Brampton RZ, PowerStream RZ, and Enersource RZ in its decision on Alectra Utilities' 2021 rate application (the 2021 Rates Decision).³⁷ The 2021 Rates Decision noted that OEB staff and Alectra Utilities agreed on updated RGCRP models for the three rate zones to extend the calculations for the RGCRP funding amounts for each year between 2022 to 2026. In the current proceeding, Alectra Utilities requested 2024 RGCRP funding for its Brampton RZ, PowerStream RZ, and Enersource RZ based on these calculations.

Brampton RZ

In its application, Alectra Utilities noted that the OEB approved the RGCRP amounts related to the renewable enabling improvement investments and renewable expansion investments from 2015 to 2019 for the Brampton RZ in the OEB's decision on the 2015 cost of service rate application of the former Hydro One Brampton Networks Inc.³⁸ Alectra Utilities has requested to collect RGCRP funding associated with these investments of \$129,051 (or \$10,754 per month) in 2024 from all provincial ratepayers, as detailed in the RGCRP model filed for the Brampton RZ.

³⁷ EB-2020-0002, Decision and Rate Order, December 17, 2020

³⁸ EB-2014-0083, Settlement Proposal, October 9, 2014, pages 14-16

Findings

The OEB approves the eligibility of the Brampton RZ plans and the associated RGCRP funding of \$129,051, or \$10,754 per month, in 2024 from all provincial ratepayers.

PowerStream RZ

In its application, Alectra Utilities noted that the OEB approved the RGCRP amounts related to the renewable enabling improvement investments and renewable expansion investments from 2016 to 2020 for the PowerStream RZ in its decision on the 2016 Custom IR application of the former PowerStream Inc.³⁹ Alectra Utilities requested to collect RGCRP funding associated with these investments of \$239,343 (or \$19,945 per month) in 2024 from all provincial ratepayers, as detailed in the RGCRP model filed for the PowerStream RZ.

Findings

The OEB approves the eligibility of the PowerStream RZ plans and the associated RGCRP funding of \$239,343, or \$19,945 per month, in 2024 from all provincial ratepayers.

Enersource RZ

In its application, Alectra Utilities noted that the OEB approved the former Enersource Hydro Mississauga Inc.'s basic Green Energy Plan (GEA Plan) in its decision on the former distributor's 2013 cost of service rate proceeding.⁴⁰ Alectra Utilities also noted that the GEA Plan identified the projects and expenditures associated with the connection of renewable generation to its system. Alectra Utilities requested to collect RGCRP funding associated with these investments of \$135,973 (or \$11,331 per month) in 2024 from all provincial ratepayers, as detailed in the RGCRP model filed for the Enersource RZ.

Findings

The OEB approves the eligibility of the Enersource RZ plans and the associated RGCRP funding of \$135,973, or \$11,331 per month, in 2024 from all provincial ratepayers.

³⁹ EB-2015-0003, Decision and Order, August 4, 2016, page 13

⁴⁰ EB-2012-0033, Decision and Order, December 13, 2012, pages 22-25

10. CAPITALIZATION DEFERRAL ACCOUNTS

In the OEB's Partial Decision and Order on Alectra Utilities' 2020 IRM application (2020 Partial Decision), the OEB adopted what it referred to as the Account 1576 approach to calculating the amounts to be recorded in the deferral accounts established to capture the impacts of changes in capitalization policy following the formation of Alectra Utilities.⁴¹ Of the predecessor companies that formed Alectra Utilities, PowerStream Inc. was the acquirer in accordance with IFRS 3 and IFRS 10. Consequently, the capitalization policies of Horizon RZ, Enersource RZ, Brampton RZ, and Guelph RZ changed to conform to its acquirer. The OEB also determined that disposition of the accounts would take place when Alectra Utilities next rebases.

In its 2020 IRM application, Alectra Utilities noted that it had migrated to a new Enterprise Resource Planning system and therefore could no longer track the actual impacts of the change in accounting policy for each rate zone starting in 2019. To record amounts going forward, Alectra Utilities proposed an allocation methodology to determine the capitalization policy impacts for each rate zone starting with the 2019 fiscal year. The OEB, in the 2020 Partial Decision, accepted Alectra Utilities' approach, but also concluded that it would be appropriate for the utility "to continue to monitor the results of the allocation methodology for unexpected results that might lead to the conclusion that an amendment is required to the allocation approach on a prospective basis."⁴²

In the OEB's Decision and Order for Alectra Utilities' 2022 IRM application, the OEB directed Alectra Utilities to continue to file evidence justifying why the allocation methodology remains appropriate, quantifying the differences between actual to forecast allocations and explaining the key drivers, particularly if the differences are material.⁴³

In this application, Alectra Utilities has provided the balances as at December 31, 2022 in the capitalization deferral accounts for the Horizon RZ, Enersource RZ, Brampton RZ and Guelph RZ. For the 2022 balances, Alectra Utilities used the same allocation methodology that was used to determine the 2019 balances and was accepted by the OEB in the 2020 Partial Decision. Alectra Utilities applied the allocation percentages to the 2022 actual distribution plant capital to determine the capitalization policy change impacts to the Horizon RZ, Enersource RZ, Brampton RZ, and Guelph RZ. Alectra Utilities explained that it determined the allocation percentages by rate zone based on a ratio of the actual impact of the capitalization policy change, prior to the ERP

⁴¹ EB-2019-0018, Partial Decision and Order, page 35

⁴² Ibid, page 38

⁴³ EB-2021-0005, Decision and Order, page 26

convergence, to the actual distribution plant capital for the corresponding period. Alectra Utilities also explained that any changes relative to the capitalization policy impacts included in the 2020 rate proceeding are driven by the actual distribution plant capital expenditures in any given year.

Alectra Utilities provided the net capitalization policy impacts for each of its rate zones from 2017 to 2022, as set out in Table 10.1 below.

Table 10.1: Impact Analysis of Capitalization Policy Change

Capitalization Policy Impact (\$000s)						
	2017	2018	2019	2020	2021	2022
Enersource RZ	1,866	1,712	1,490	1,491	1,601	1,109
Brampton RZ	(1,831)	(1,610)	(1,976)	(2,283)	(3,293)	(2,702)
Horizon RZ				6,512	6,092	6,785
Guelph RZ				432	367	480
Net PP&E Change	36	102	(485)	6,153	4,766	5,672
Enersource RZ	(47)	(89)	(127)	(164)	(204)	(232)
Brampton RZ	46	86	135	192	275	342
Horizon RZ				(163)	(315)	(485)
Guelph RZ				(11)	(20)	(32)
Depreciation Impact	(1)	(3)	9	(145)	(264)	(406)
Enersource RZ	1,819	1,622	1,364	1,327	1,397	877
Brampton RZ	(1,785)	(1,524)	(1,840)	(2,090)	(3,019)	(2,360)
Horizon RZ				6,349	5,777	6,300
Guelph RZ				422	347	448
Alectra Utilities Net Impact	35	98	(477)	6,007	4,502	5,266

Alectra Utilities explained that changes to the capitalization policy impacts for 2022 are the result of decreased System Access and System Renewal capital for the Enersource RZ and Brampton RZ, and increased System Renewal and System Service capital for the Horizon RZ.

Findings

The OEB accepts the allocation methodology applied by Alectra Utilities to the capitalized deferral accounts for each of the Horizon RZ, Enersource RZ, Brampton RZ and Guelph RZ as at December 31, 2022. This allocation methodology was also accepted by the OEB in its 2020 Partial Decision. In its analysis of the reasonableness of the methodology, Alectra Utilities noted that the change in capitalization policy impact

for 2022 is consistent with the change in distribution plant capital over the 2021 to 2022 period and that the methodology remains appropriate.⁴⁴ The OEB agrees.

This issue of allocation will persist in Alectra Utilities' IRM proceedings until it rebases in 2027. The OEB expects that, in 2027, Alectra Utilities will apply to dispose of the accumulated balances in the capitalization deferral accounts and that, at that time, the parties to that proceeding will have the opportunity to review and test the accumulated balances. In the interim, the OEB expects the continuation of annual allocations. As indicated in the 2020 Partial Decision, the allocation of the capitalized differential balance among rate zones is not an exact science and estimates are required. A number of factors will change the annual allocation calculations, resulting in differences between forecast and actual impacts.

In its 2025 IRM application, the OEB expects that Alectra Utilities will continue to file evidence justifying why the allocation methodology remains appropriate, quantifying the differences between actual to forecast allocations and explaining the key drivers, particularly if the differences are material.

⁴⁴ The Guelph RZ was excluded from this analysis since the 2020, 2021 and 2022 capitalization policy impact was determined based on its legacy system: Application, August 17, 2023, Exhibit 2, Tab 1, Schedule 2, page 6 of 7

11. EARNINGS SHARING MECHANISM

On March 26, 2015, the OEB issued its *Report of the Board: Rate-making Associated with Distributor Consolidation* (MAADs Policy).⁴⁵ The MAADs Policy introduced an extended deferred rebasing period for consolidating entities and included a requirement for an earnings sharing mechanism (ESM). This ESM would have a 50:50 sharing between the utility and customers for any of the consolidated entity's earnings that were more than 300 basis points above the allowed return on equity (ROE) for any extended period beyond the initial five-year deferral period.⁴⁶

In 2016, the OEB issued its Handbook to Electricity Distributor and Transmitter Consolidations (MAADs Handbook) that confirmed that "no evidence is required in support of an ESM that follows the form set out in the [MAADs Policy]."⁴⁷

In the Decision and Order approving the formation of Alectra Utilities (the MAADs Decision),⁴⁸ the OEB ordered Alectra Utilities to file plans for an ESM by December 31, 2019.

In its 2020 rate application, Alectra Utilities filed a proposal for an ESM in which earnings in excess of 300 basis points above the OEB's established ROE for the consolidated entity would be divided on a 50/50 basis between Alectra Utilities and its ratepayers. The proposal stated that as a consolidated utility that has not rebased, there is no "approved" ROE for Alectra Utilities against which the ESM could be determined. In this regard, for the purposes of the ESM calculation, Alectra Utilities proposed to apply the weighted average OEB-approved ROE for each predecessor utility (weighted by the OEB-approved rate base amounts from the most recent rebasing application for each predecessor utility) as at the time of Alectra Utilities formation in 2017. Alectra Utilities also proposed that the ratepayers' share of excess earnings would be credited to a newly proposed variance account, for clearance at the next applicable annual IRM application filing. The recorded excess earnings will be shared with customers of the Enersource, Horizon Utilities, PowerStream and Brampton rate zones only.⁴⁹

In the Partial Decision (for Alectra Utilities' 2020 rate application), the OEB approved Alectra Utilities' ESM proposal as filed, stating that the proposal is consistent with the OEB's MAADs Policy. The OEB further stated that the ESM shall consider the earnings of Alectra Utilities in years six to ten of the deferred rebasing period as a consolidated entity. The OEB accepted Alectra Utilities' proposal to utilize a weighted average ROE

⁴⁵ EB-2014-0138

⁴⁶ MAADs Policy, page 7

⁴⁷ https://www.oeb.ca/oeb/Documents/Regulatory/OEB_Handbook_Consolidation.pdf, page 16

⁴⁸ EB-2016-0025, Decision and Order, December 8, 2016

⁴⁹ Alectra Utilities' 2020 rate application, EB-2019-0018, Exhibit 2, Tab 1, Schedule 6

for all applicable rate zones in determining the approved ROE for Alectra Utilities. The OEB further noted that the methodology in calculating approved ROE for a newly consolidated entity, or any allocations that would be required between rate zones in determining deemed and achieved returns, are not discussed in either the MAADs Policy, MAADs Handbook, or in MAADs Decision. Therefore, the OEB deferred these matters for consideration in Alectra Utilities' first rate application following the completion of its 2022 fiscal year. The OEB expected Alectra Utilities to address these issues in its evidence related to the ESM at that time.⁵⁰

In the current rate application, for the purposes of the ESM calculation, Alectra Utilities calculated and reported the 2022 ROE results for both Alectra Utilities as an entire consolidated entity with all five rate zones (referred to as "Alectra Consolidated") and Alectra Utilities' based on its original four rate zones only (i.e. excluding the Guelph RZ) (referred to as "Alectra 4 RZs").

Alectra Utilities' results were based on a combination of a prior approved methodology for calculating the deemed ROE for the four rate zones that are subject to the ESM commencing with 2024 rates, and a new methodology (using three different scenarios) for assessing actual results to remove the impacts of the Guelph RZ.

For all scenarios, Alectra Utilities reported that it not only did not trigger the ESM at 300 basis points above the deemed, but that it underearned by a significant margin from the deemed ROE (i.e. by approximately 230 basis points).

Findings

Based on the results of the ESM calculation, Alectra Utilities concluded that under all scenarios, Alectra Utilities did not over earn in 2022 and the ESM is not triggered. Alectra Utilities filed evidence and responded to questions from OEB staff on this matter. The OEB accepts these results for the 2022 year noting that Alectra Utilities performed significantly under their deemed ROE for the consolidated four rate zones that are subject to the ESM for 2024 rates.

This application is being heard by an employee of the OEB who has delegated authority to make determinations under Section 6 of the OEB Act. For that reason, the OEB is not at this time approving Alectra Utilities methodology for calculating actual ROE, nor is the OEB opining at this time on any other methodological matters for purposes of informing the ESM calculation for future fiscal years.

⁵⁰ EB-2019-0018, Partial Decision and Interim Rate Order, December 12, 2019, page 43

The OEB may in a future proceeding conduct a more detailed review of the remaining portions of the ROE methodology that have not to date been subject to an OEB decision. The OEB expects that Alectra Utilities will continue to support its ESM assessment with sufficient evidence and explanations in its next rate application regardless of whether it triggers any sharing with ratepayers.

12. IMPLEMENTATION

This Decision is accompanied by Rate Generator Models, applicable supporting models, and a Tariff of Rates and Charges (Schedule A). The Rate Generator Models also incorporate the rates set out in Table 12.1.

Table 12.1: Regulatory Charges

Rate	per kWh
Rural or Remote Electricity Rate Protection (RRRP)	\$0.0014
Wholesale Market Service (WMS) billed to Class A and B Customers	\$0.0041
Capacity Based Recovery (CBR) billed to Class B Customers	\$0.0004

Each of these rates is a component of the “Regulatory Charge” on a customer’s bill, established annually by the OEB through a separate, generic order. The RRRP and WMS rates were set by the OEB on December 7, 2023.⁵¹

The Smart Metering Entity Charge is a component of the “Distribution Charge” on a customer’s bill, established by the OEB through a separate order. The Smart Metering Entity Charge was set by the OEB at \$0.42 on September 8, 2022.⁵²

In the *Report of the Board: Review of Electricity Distribution Cost Allocation Policy*,⁵³ the OEB indicated that it will review the default province-wide microFIT charge annually to ensure it continues to reflect actual costs in accordance with the established methodology. On November 29, 2023, the OEB issued a letter advising electricity distributors that the microFIT charge shall remain at \$4.55 for the duration of the 2024 rate year (January 1 to December 31, 2024).⁵⁴

RESIDENTIAL SERVICE CLASSIFICATION

This classification applies to an account where the electricity is supplied exclusively to single-family dwelling units for domestic or household purposes, including seasonal occupancy. This includes, but is not limited to, detached houses, one unit of a semi-detached, duplex, triplex or quadruplex house, with a residential zoning. Separately metered dwellings within a town house complex also qualify as residential customers. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

MONTHLY RATES AND CHARGES - Delivery Component

Service Charge	\$	28.03
Rate Rider for Recovery of Incremental Capital (2021) - in effect until the effective date of the next cost of service based rate order	\$	0.22

GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION

This classification applies to a non residential account whose average monthly maximum demand is less than, or is forecast to be less than, 50 kW. Multi-unit residential establishments such as apartment buildings supplied through one service (bulk metered) shall normally be classified as general service. Where service is provided to combined residential and business, or residential and agricultural, whether seasonal or all-year premises, and the wiring does not provide for separate metering, the service shall normally be classed as general service. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

GENERAL SERVICE 50 TO 699 KW SERVICE CLASSIFICATION

This classification applies to a non residential account whose average monthly maximum demand used for billing purposes is equal to or greater than, or is forecast to be equal to or greater than, 50 kW but less than 700 kW. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

STANDBY POWER SERVICE CLASSIFICATION

This classification refers to an account that has Load Displacement Generation and requires the distributor to provide back-up service. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

RESIDENTIAL SERVICE CLASSIFICATION

This classification refers to all residential services including, without limitation, single family or single unit dwellings, multifamily dwellings, row-type dwellings and subdivision developments. Energy is supplied in single phase, 3-wire, or three phase, 4 wire, having a nominal voltage of 120/240 volts. There shall be only one delivery point to a dwelling. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

GENERAL SERVICE 500 TO 4,999 KW SERVICE CLASSIFICATION

This classification refers to a non-residential account whose monthly average peak demand is equal to or greater than, or is forecast to be equal to or greater than, 500 kW but less than 5,000 kW. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

Billing demands are established at the greater of 100% of the kW, or 90% of the kVA amounts.

MONTHLY RATES AND CHARGES - Delivery Component

LARGE USE SERVICE CLASSIFICATION

This classification refers to an account whose monthly average peak demand is equal to or greater than, or is forecast to be equal to or greater than, 5,000 kW. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

Billing demands are established at the greater of 100% of the kW, or 90% of the kVA amounts.

UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification applies to an account taking electricity at 750 volts or less whose average monthly maximum demand is less than, or is forecast to be less than, 50 kW and the consumption is unmetered. The amount of electricity consumed by unmetered connections will be based on detailed information/documentation provided by the device's manufacturer and will be agreed to by Alectra Utilities and the customer and may be subject to periodic monitoring of actual consumption. Eligible unmetered loads include cable TV power packs, bus shelters, telephone booths, traffic lights, railway crossings, etc. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

RESIDENTIAL SERVICE CLASSIFICATION

This classification includes accounts taking electricity at 750 volts or less where the electricity is used exclusively in a separately metered living accommodation. Customers shall be residing in single-dwelling units that consist of a detached house or one unit of a semi-detached, duplex, triplex or quadruplex house, with a residential zoning. Separately metered dwellings within a town house complex or apartment building also qualify as residential customers. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

GENERAL SERVICE 50 TO 999 KW SERVICE CLASSIFICATION

This classification includes non-residential accounts where monthly average peak demand is equal to or greater than, or is forecast to be equal to or greater than, 50 kW but less than 1,000 kW. Note that for the application of the Retail Transmission Rate - Network Service Rate and the Retail Transmission Rate - Line and Transformation Connection Service Rate the following sub-classifications apply: General Service 50 to 999 kW non-interval metered, and General Service 50 to 999 kW interval metered. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

microFIT SERVICE CLASSIFICATION

This classification applies to an electricity generation facility contracted under the Independent Electricity System Operator's microFIT program and connected to the distributor's distribution system. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

RETAIL SERVICE CHARGES (if applicable)**APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment, and the HST.

Retail Service Charges refer to services provided by a distributor to retailers or customers related to the supply of competitive electricity.

One-time charge, per retailer, to establish the service agreement between the distributor and the retailer	\$	117.02
Monthly fixed Charge, per retailer	\$	46.81
Monthly variable Charge, per customer, per retailer	\$/cust.	1.16
Distributor-consolidated billing monthly charge, per customer, per retailer	\$/cust.	0.69
Retailer-consolidated billing monthly credit, per customer, per retailer	\$/cust.	(0.69)
Service Transaction Requests (STR)		
Request fee, per request, applied to the requesting party	\$	0.59
Processing fee, per request, applied to the requesting party	\$	1.16
Request for customer information as outlined in Section 10.6.3 and Chapter 11 of the Retail Settlement Code directly to retailers and customers, if not delivered electronically through the Electronic Business Transaction (EBT) system, applied to the requesting party		
Up to twice a year		no charge
More than twice a year, per request (plus incremental delivery costs)	\$	4.68
Notice of switch letter charge, per letter (unless the distributor has opted out of applying the charge as per the Ontario Energy Board's Decision and Order EB-2015-0304, issued on February 14, 2019)	\$	2.34

LOSS FACTORS

If the distributor is not capable of prorating changed loss factors jointly with distribution rates, the revised loss factors will be implemented upon the first subsequent billing for each billing cycle.

Total Loss Factor - Secondary Metered Customer < 5,000 kW	1.0260
Total Loss Factor - Secondary Metered Customer > 5,000 kW	1.0137
Total Loss Factor - Primary Metered Customer < 5,000 kW	1.0157

RESIDENTIAL SERVICE CLASSIFICATION

This classification applies to an account taking electricity at 750 volts or less where the electricity is used exclusively in a separately metered living accommodation. Customers shall be residing in single-dwelling units that consist of a detached house or one unit of a semi-detached, duplex, triplex or quadruplex house, with a residential zoning. Separately metered dwellings within a town house complex or apartment building also qualify as residential customers. All customers are single-phase. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION

This classification applies to a non-residential account whose average monthly maximum demand used for billing purposes is equal to or greater than, or is forecast to be equal to or greater than, 50 kW but less than 5,000 kW. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification applies to an account taking electricity at 750 volts or less whose average monthly maximum demand is less than, or is forecast to be less than, 50 kW and the consumption is unmetered. Such connections include cable TV power packs, bus shelters, telephone booths, traffic lights, railway crossings, etc. The level of the consumption will be agreed to by the distributor and the customer, based on detailed manufacturer information/documentation with regard to electrical consumption of the unmetered load or periodic monitoring of actual consumption. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

RESIDENTIAL SERVICE CLASSIFICATION

This classification refers to an account taking electricity at 750 volts or less where the electricity is used exclusively in a separately metered living accommodation. Customers shall be residing in single-dwelling units that consist of a detached house or one unit of a semi-detached, duplex, triplex or quadruplex house, with a residential zoning. Separately metered dwellings within a town house complex or apartment building also qualify as residential customers. Multi-unit residential establishments such as apartment buildings supplied through one service (bulk metered) shall be classified as general service. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION

This classification refers to a non-residential account whose monthly average peak demand is equal to or greater than, or is forecast to be equal to or greater than, 50 kW but less than 5,000 kW, both regular and interval metered. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

LARGE USE SERVICE CLASSIFICATION

This classification refers to an account whose monthly average peak demand is equal to or greater than, or is forecast to be equal to or greater than, 5,000 kW. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification refers to an account taking electricity at 750 volts or less whose average monthly peak demand is less than, or is forecast to be less than, 50 kW and the consumption is unmetered. Such connections include cable TV power packs, bus shelters, telephone booths, traffic lights, railway crossings, etc. The customer will provide detailed manufacturer information/documentation with regard to electrical demand/consumption of the proposed unmetered load. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.
